

Silent Marine

Silent Marine Mountings were originally designed for use with marine propulsion engines and therefore are failsafe and can accommodate thrust. Nowadays Silent Marine is popular throughout a wide range of industries. Offering a High Performance, Easy Installation & cost effective solution to reducing vibration. The mountings provides different stiffness' in each direction, which provides optimum performance, particularly for I.C. Engines

Products can also be supplied with Lloyds Approval.

Applications include:- Marine Propulsion engines, Generating Sets, Diesel Engines, Vehicles, Pumps, and Compressors.

HEIGHT ADJUSTER STUDS AVAILABLE - SEE PAGE 25
