Simmerring BAUM ...

Simmerring BAUMSL ...

Product description

Standard types according to DIN 3760 with outer elastomer sleeve and spring-loaded fluorine rubber sealing lip for high thermal and chemical requirements. Available with or without additional dust lip to protect against light to medium levels of exterior soiling.

Product advantages

- Broad range of possible applications in every sector of industry
- Increased thermal stability and chemical resistance
- Reliable sealing of the housing bore, even with increased roughness of the bore, thermal expansion and split housings, thus a sealing of low viscosity and gaseous media also possible
- Advantages when sealing low viscosity and gaseous media
- Additional dust lip as additional seal against moderate and medium dust and dirt ingress from outside (BAUMSLX7).
(Note: can lead to temperature increase from frictional heat)

Product properties

- Outer casing: elastomer (smooth, grooved = X7)
- Spring-loaded sealing lip
- Additional dust lip (BAUMSL, BAUMSLX7)
- Friction-optimised sealing lip profile

Application

- Axles (when subject to moderate dirt)
- Power tools
- Industrial gearboxes
- Agricultural and construction machinery transmissions
